

SHERRIN Equipment

CONTINUES EXPANSION IN VICTORIA

As a result of strong sales and the continued growth of our hire fleet in Victoria, Sherrin Equipment is pleased to announce the addition of our second fully trained and equipped Field Service Technician for our Victorian operations.

As our national fleet of hire EWP's approaches 100 nationally Victoria has been a robust contributor to our exceptional growth since entering the hire market. This growth, when coupled with our strengthening sales volumes into the Power and Telecommunications industries throughout Victoria, Sherrin Equipment has acted quickly to ensure that our valued customer base continues to receive the service levels that we are well renowned for.

Both of our Field Service Mechanics will be equipped with Service Vehicles that will enable them to complete servicing and maintenance requirements of our customers throughout metropolitan and country Victoria.

Our Service Vehicle shown below will incorporate its own oil tanks for not only the supply of, but also the removal of, hydraulic and engine oils from sites, ensuring our commitment to minimising our environmental impact.

Each Service Vehicle will be stocked with parts and tools to ensure we expedite the return to work of the EWP in a timely manner and with minimal disruption to work schedules.

This latest addition, along with our recently secured national phone number **1300 905 550** which is manned by our own staff 24/7, strongly reflects our company's commitment to service. These steps also confirm our desire to remain at the forefront of the EWP Manufacturing and EWP Hire industries throughout Australia.
